PROFILE

Versatile Software Engineer with strong experience in backend and full-stack development across multiple technologies, including Laravel (PHP), .NET (C#), Odoo (Python & XML), Node.js (Express), Java, and C. Experienced in building scalable systems, developing APIs, and integrating enterprise solutions such as ERP platforms. Also proficient in frontend development using React.js and TailwindCSS to build responsive and user-friendly interfaces. Has a solid foundation in UI/UX design with a focus on usability and user-centered design. Passionate about continuous learning and highly motivated to contribute effectively in both collaborative team environments and independent work settings.

EDUCATION

Universitas Pendidikan Indonesia – Bandung, Indonesia 2021 – 2026
S1 – Computer Science (GPA: 3.79/4.00)

SMK Negeri 13 Bandung 2018 – 2021
Computer & Network Engineering (GPA: 90.3/100)

EXPERIENCE

BINUS University IT Division – Bandung, Indonesia Jul 2025 – present
.Net Developer

- Contributed to multiple academic system projects, including an academic marketplace platform called Binus Neksus, as well as modules such as Scholarship, Lecturer Profile, and Lecture Services.
- Worked on both backend and frontend development, including implementing system architecture components such as Business Logic Layer (BLL) and Data Access Layer (DAL).
- Developed and maintained scheduler systems to support automated processes and data synchronization across services.
- Prepared and managed data pipelines from data warehouse to consume databases, ensuring data readiness for frontend applications.
- Collaborated with internal teams through regular meetings to discuss system requirements, progress, and technical solutions.
- Assisted in designing system flows and user journeys for the academic marketplace platform to improve usability and structure.

PT Salamun Teknologi Indonesia – Bandung, Indonesia Jan 2025 – present
Backend Developer

- Contributed to a government project with PUPR, developing a regional mapping licensing portal using Laravel.
- Supported project management processes tailored for PUPR requirements, ensuring structured and efficient development workflows.
- Assisted the team in handling a project for Mursmedic, including company profile website and internal system development using Spring Boot (Java) as a backend developer.
- Collaborated with cross-functional teams to solve technical challenges, and ensure smooth project execution.
- Conducted system testing and participated in client presentations to demonstrate project outcomes and ensure requirements were met.

BPSDM Provinsi Jawa Barat – Bandung, Indonesia*Oct 2023 – Oct 2025**UI/UX Developer*

- Designed UI/UX for ARSI website based on West Java government design guidelines (color, typography, branding).
- Created wireframes and user flows to improve system usability.
- Designed 5+ logo concepts following official government design standards.
- Produced motion graphics for launch event, including release video and looping background visuals.

PT. Fujicon Priangan Perdana – Bandung, Indonesia*Aug 2024 – Jan 2025**Odoo Developer*

- Developed a custom ERP add-on “Management Construction” using Odoo 17 to support construction business processes.
- Implemented core modules including Risk Mitigation, Budget Planning, Daily Reports, and dynamic form configuration.
- Integrated advanced features such as S-Curve tracking and Generative AI to enhance system capabilities.
- Ensured integration between Odoo backend and mobile applications for real-time data access.
- Collaborated directly with stakeholders (Director, Managers, IT Team) to align development with business needs.
- Performed testing, debugging, and optimization to ensure system reliability and performance.

PT. Jasamedika Saranatama – Bandung, Indonesia*January 2024 – Mei 2024**Backend Developer & Frontend Developer*

- Understanding and implementing the concept of Object and Key Result in performing tasks
- Debugging existing programs, identifying and fixing errors or bugs found to improve application performance and stability.
- As a Back-end, Creating an API for SIRs using Express.js as the framework and MongoDB as the DBMS.
- As a Front-end, Creating a website using ReactJS and TailwindCSS as framework, Figma as design tools, and Katalon, JMeter for testing.
- Creating user documentation such as manual books, style guides, README files, and other project documentation.

Sixth Projects – Bandung, Indonesia*October 2023 – December 2023**Project Manager & Full Stack Developer*

- Trusted to work with SMKN 13 Bandung in developing the “SISPEK13” website as the school organization's profile.
- Integrating authentication and authorization services with Laravel and MySQL on the Back-end, while developing the website using TailwindCSS on the Front-end.
- Designing, creating, presenting daily progress, testing, and deploying the website to the server using CPanel.

- Implemented Scrum methodology with Trunk-Based Development approach, combining iterative and incremental development with continuous integration and collaboration principles in software development.
- Implementing business logic and website development using Laravel assisted by TailwindCSS to design a responsive and modern user interface.
- Integrating multiple uses of external APIs and technologies such as authorization & authentication systems, and queue systems (Redis).

SELECTED PROJECTS

TOEFLIFY (2024)	As a Full Stack Developer in developing a web-based TOEFL practice platform integrated with Generative AI and aligned with CEFR scoring standards, achieving 3rd place in DIMAS-TI 2024.
ARSI (2023)	As UI/UX Designer Designed the user interface for the corporate application “BPSDM West Java”, using design thinking principles and focusing on user pain points as well as creating the identity of the application such as logo, typography, color scheme, and brand voice.
LenderUp (2023)	As a UI/UX Designer and Front End Developer in the development of a mobile peer-to-peer lending application using Flutter.
SISPEK13 (2023)	As a Project Manager and UI/UX Designer in the development of the organization's website profile with a user-centered approach and interactive design to enhance user satisfaction.
MOTOOM (2022)	Creating an IoT soil moisture system integrated with a website to display soil moisture data for plant care assistance.
